Church of Scotland Safeguarding Policy Statement 2010

Ensuring a Safe Church for All

The Church of Scotland has a deep concern for the wholeness and wellbeing of each individual. Through its Congregations, working together with the Safeguarding Service and statutory agencies, the Church seeks to safeguard the welfare of all people who come into contact with the Church and its services.

The Gospel proclaims that it's the responsibility of everyone within the fellowship of the Church to prevent harm, be it physical, sexual or emotional, and we will always seek to reduce risk.

The Church's commitment to safeguarding reminds us that God cares passionately about the welfare and wellbeing of all people.

Further details of the Church's theology of Safeguarding can be found in the For of such is the Kingdom of Heaven General Assembly Report May 2009.

Fire

1. It is the responsibility of all users to ensure that all group members are familiar with the **PROCEDURE IN THE EVENT OF FIRE** leaflet (see below).
2. Fire exits must never be obstructed, routes to fire exits must be clear at all times. Check that doorways are kept free from obstructions.
3. Within the church halls the leader of the group that discovers the fire or a nominated person from that group should take immediate control of the situation. This will involve:
 - Asking someone to call the fire brigade and ring the alarm bell.
 - On hearing the alarm the leaders of all groups should supervise the evacuation of their groups from the halls, using the designated escape routes. Assemble on the pavement at the corner of Abinger Gardens and Ormidale Terrace. Once assembled at that location remain there and be able to report to the Emergency Services.
 - Groups should ensure that the toilets adjacent to their halls are checked on the way out in case someone needs assistance.
 - Those evacuated should be asked to remain at the assembly point and asked not to leave the site at this stage. All those present should be asked if they are aware of anyone missing. People can leave once everyone is accounted for.
 - Nobody should re-enter the building until it is deemed safe by the Fire Brigade.

PROCEDURE IN THE EVENT OF FIRE

9. If you hear the Fire Alarm immediately escort the persons in your charge to safety outside the building.
10. Assemble on the pavement at Abinger Gardens, beside the church.
11. When the people leaving the building assemble, take a roll call of those present and give this information to the person in charge.
- 12 .Once the building has been evacuated UNDER NO CIRCUMSTANCES must the building be re-entered without the permission of the Fire Officer in charge.
13. CALL THE FIRE BRIGADE IMMEDIATELY TO EVERY FIRE OR SUSPICION OF FIRE.

NOTICE TO ALL DISABLED LIFT USERS

Murrayfield Parish Church Centre provides an open platform lift for our disabled users only and is not for general or baby buggy use.

This lift runs through from its lowest calling-point at the end of the corridor to the rear of the main hall, stopping outside the Quiet room and goes up to the upper room.

This lift undergoes quarterly maintenance by qualified engineers to ensure its safety.

Open platform lifts operate differently from standard lifts. It has been brought to our attention that there have been occasional instances of operator error which have been frustrating for would-be users. I would therefore ask you to pass on the following information to any disabled person in your group who intends to use our lift.

When “calling“ the lift you must keep your finger FIRMLY on the button until the lift arrives and you hear the bell signal that it has done so . At this point only, release the button. If the button is even slightly released during the “calling” procedure, whilst the red light will remain illuminated on the button, the safety features have locked the lift for approximately 40 seconds. Repeated pressing of the button will keep resetting this safety feature and the lift will appear stuck.

Once inside the lift -the large red emergency button is extremely sensitive and its function is to stop this disabled platform lift. Please ensure that you do not accidentally press it or the lift will stop and need to be externally wound down manually. If accidentally pressed, twist the red button to reset. Please be aware that this lift does not have an externally monitored alarm and will only sound directly outside the appliance. Manual “wind-down” instructions can be found on the outside of the lift and are also printed below:

In the event of lift failure

- Advise anyone in the lift that you are going to manually wind the lift down in order to open it and to stay calm.
- Advise anyone in the lift that the lights will go out when you start the process of bringing the lift down .This is normal and will take under 1 minute.

In the event of lift failure (continued)

- Proceed to lift control cupboard directly behind the lift on the “ground” floor. i.e. same floor as The Quiet (stage) room.
- Go right to the back of the cupboard and turn left- there is a torch here as well as emergency lighting.
- You will see the large grey lift control box positioned on the floor, under the stairs.
- Turn the big red switch on the left of this grey box to “off”
- Next -hold down the red button on the right of the motor cover (marked) to manually bring the lift down. Keep pressing this button down until you hear that the motor has stopped.
- Open door of lift which will be at ground floor level.
- Once lift is at ground floor and there is nobody in the lift, turn the big red switch on the left to “on” to re-establish power.
